WELDING PIN

VBS

VBS bi-metal insulating pins are specifically designed for securing technical insulation to aluminum structures. Utilizing our new crimping technology, these pins provide enhanced durability and resistance to various loads, ensuring long-term fastening stability. For optimal performance, it is recommended to weld VBS pins using our N-5 capacitor welder or our INVERTER 500 welder.

TECHNICAL SPECIFICATIONS

	STANDARD	OPTIONS
Pin diameter:	3 mm	-
Pin material:	copper-coated steel	16Mo3, stainless or galvanized steel
Pin length:	30mm - 1000mm	-
Pin End:	"chisel" 	"grinded" 
Pin surface:	smooth	with knurling
Muff material:	AlMg3	-
Packaging:	cardboard	bucket

NOTES:
VBS PINS ARE MADE TO ORDER AND SOLD WITHOUT CLIPS
MINIMUM ORDER QUANTITY IS 1,000 PIECES
