## CAPACITOR DISCHARGE WELDING UNIT N-5 + PGN

*The N-5 welder, paired with the PGN gun, is specifically engineered for the precise welding of reverse pins. This machine guarantees quick charging, dependable performance, and minimal operating costs. All key operations are monitored and displayed on LED panel, while the built-in fan with thermal regulation ensures optimal efficiency and extends the system’s lifespan. For better welding outcomes, the use of GZON and GZONI pins is highly recommended, due to their exceptional material quality and manufacturing process.*

## TECHNICAL SPECIFICATIONS

|                         |                          |
|-------------------------|--------------------------|
| Welding range:          | “Reverse pins”           |
| Weldable materials:     | Steel, stainless steel   |
| Welding process:        | Contact                  |
| Capacity:               | 66,000 µF                |
| Charging:               | 50-200 V (adjustable)    |
| Digital voltmeter:      | Yes                      |
| Duty cycle:             | up to 10 nails/min       |
| Energy:                 | 1,320 Ws                 |
| Mains power supply:     | 230 V - 50/60 Hz - 10 AT |
| Dimensions (W x H x L): | 165 x 250 x 380 mm       |
| Weight:                 | 12.5 kg                  |

- THE SET COMPRISES:**
- WELDING MACHINE N-5
  - AN EARTH WIRE WITH GROUND CLAMPS
  - PGN GUN FOR REVERSE PINS WITH A MAGNETIC TIP

- OPTIONS:**
- BOX ON WHEELS FOR EASY TRANSPORT
  - PSN GUN (FOR PINS AND STUDS)
